Re: Skookumchuck Mill Issues on the Weekend on June 15 – 17, 2007  
Rod McKay Recognition

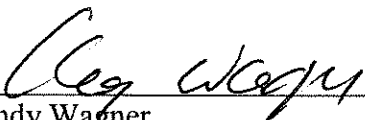

Dear Kevin;

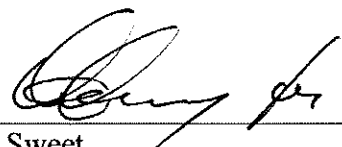

During the weekend of June 15 – 17, we encountered significant operational failures in our mill. In particular, we had a black liquor line leak on our digester bottom circulation piping. In addressing this failure, there was much to be done to identify the problems, plan repairs, secure resources and materials and coordinate and conduct the repairs.

There were several people that were instrumental in making all of this happen in an expeditious manner. As a part of this team, Rod responded immediately to our needs to arrange for shipment of pipe parts to allow the repairs to continue expeditiously. This spirit is instrumental in addressing these kinds of unforeseen failures and this work was completed correctly, quickly and most importantly, safely.

We would like to thank Westlund, in particular Rod McKay, for his commitment and cooperation during that very challenging and hectic time.

Sincerely,
