Hayward Flow Control Now Available Through Westlund

Westlund EMCO Water Solutions and Hayward Flow Control are proud to announce their cooperation to supply contractors and end-users with Hayward industrial thermoplastic products and solutions throughout Canada for the Water and Wastewater Treatment market segment. The national Hayward program with Westlund will include, but not limited to, the following industry leading product lines:

- Manual and Actuated Ball and Butterfly Valves
- Electric and Pneumatic Actuation
- Complete Range of thermoplastic Check Valves
- Y Pattern and Basket Strainers
- Industrial Bag and Cartridge Filters, as well, as Filter Media
- Flow Control and ChemFeed Valves
- Instrumentation for Level and Flow Measurement

Westlund/EMCO Water Solutions carries a customized regional inventory of these products, with an additional base availability & support from Hayward in Oakville, Ontario.

For more than 50 years, Hayward Flow Control's thermoplastic flow control products and solutions have proven to excel in the critical environments and applications they serve. Hayward understands the precise requirements for water treatment systems and are committed to offering advantageous fluid handling products for your application that will keep your systems working right for years to come. Hayward solutions are ready for your water treatment operation – from municipal drinking and wastewater treatment to the most complex industrial water and wastewater treatment systems.

WESTLUND/EMCO Water Solutions is the leader in providing “inside the fence supply solutions” to the In-Plant water and wastewater market *nationally*. We offer the largest scope of construction material of any supplier; nurturing and sustaining successful partnerships and value-add opportunities throughout the construction process. Our pledge is to establish lasting relationships with our customers by exceeding their expectations and gaining their trust through exceptional performance by every member of our team
