Can I see a pop-up that Internet Explorer blocked?

Yes. Follow these steps:

1. Open Internet Explorer by clicking the **Start** button and then clicking **Internet Explorer**.
2. Navigate to a website with a pop-up, and then click the Information bar when it notifies you that a pop-up window has been blocked.
3. Click **Show Blocked Pop-up**.

Note: You can allow a pop-up to be displayed by pressing CTRL or CTRL+ALT as you click a link to open a website that has pop-ups. The method depends on the version of Internet Explorer that you are using.

How can I choose to allow pop-ups from a specific website?

By default, Internet Explorer displays pop-ups that appear as a result of you clicking a link or button. Pop-up Blocker blocks pop-ups that are displayed automatically (without you clicking a link or button). If you want to allow a specific website to display automatic pop-ups, follow these steps:

1. Open Internet Explorer by clicking the **Start** button and then clicking **Internet Explorer**.
2. Click the **Tools** button, click **Pop-up Blocker**, then click **Pop-up Blocker Settings**.
3. In the **Address of website to allow** box, type the address (or URL) of the website you want to see pop-ups from, and then click **Add**.
4. Repeat step 3 for every website you want to allow pop-ups from. When you are finished adding websites, click **Close**.

How do I change the Pop-up Blocker settings?

1. Open Internet Explorer by clicking the **Start** button and then clicking **Internet Explorer**.
2. Click the **Tools** button, click **Pop-up Blocker**, then click **Pop-up Blocker Settings**.
3. Make the changes that you would like, and then click **Close**.
